

## CS 440 Meeting Minutes

Group 5 Date: March 27, 2023 Time: 3pm Duration: 30 mins

Present, on time: Russel Tjahjadi, Mohammad Zaid, Arijus Trakymas , Sharva Darpan Thakur

Present, not on time: N/A

Absent: N/A

---

Synopsis: We will continue to implement the features in the current sprint for the demo on Friday.

Recent Accomplishments: Zaid researched how to send data between different pages. Sharva and Arijus researched how to send user data to the cloud so it can be loaded later. Russel looked into how to get nearby restaurants using an API.

Current Activities: Arijus is working on making the recipes page more user-friendly and appealing. Russel is working on the backend for getting restaurant information. Sharva is implementing the find nearby grocery stores feature so users can browse nearby grocery stores. Zaid is looking into how to get trending recipes from an API so he can ultimately use that.

Action Items: Sharva and Arijus will focus on implementing a navigation bar so that the user can navigate between pages. Zaid will finish implementing the trending page so users can browse trending recipes. Russel will finish implementing the restaurants screen of the app in the case users do not want to cook.
