

## CS 440 Meeting Minutes

Group: 5 Date: 16 March 2023 Time: 2pm Duration: 30 mins

Present, on time: Arijus Trakymas, Russel Tjahjadi , Sharva Darpan Thakur , Mohammed Zaid

Present, not on time: N/A

Absent: N/A

---

Synopsis: We have made the app to start working to send the user information and connect it to the database.

Recent Accomplishments: Arijus and Sharva have found a way to send the user data to firebase. Russel has started to find the technologies needed to view the restaurants. Zaid has also found the technologies that help the user stay logged in.

Current Activities: Arijus is working on a way to make the design of the recipe icons more appealing to the user. Russel is starting to implement on how to use the API on how to add a feature in the application which shows user location. Sharva is researching on how to find a better and efficient way to send user data to the firebase. Zaid is finding a way to have the users log out.

Action Items: Zaid will complete the part of letting the users stay logged in even after closing the app. Sharve and Arijus will implement the user input preference to the firebase. Russel will finish developing the page displaying recipes for users who select the “Does not want to cook” option.
