

CS 440 Meeting Minutes

Group: 5 Date: 24 February 2022 Time: 2pm Duration: 30 mins

Present, on time: Arijus Trakymas, Russel Tjahjadi , Sharva Darpan Thakur , Mohammed Zaid

Present, not on time:

Absent: N/A

Synopsis: We have implemented most of the features that were outlined in scenario one. We started using the API called Spoonacular and the documentation is retrieved at: <https://spoonacular.com/>. We have started brainstorming the features that should be included in scenario two.

Recent Accomplishments: Arijus and Sharva finished implementing fetching data from the food API and showing it on the home page. Russel fixed the authentication for the login. Zaid completed the input preference screen.

Current Activities: Russel will start to look more about how to implement the UI in Flutter with the functionality of the Food API. Zaid will look into how to integrate the input preferences into the calling of the API. Sharva and Arijus will be working on brainstorming ideas for the next sprint and research how to leverage more API's to show food by location.

Action Items: Arijus will look into other APIs and Zaid will research how to include the input preferences data into the fetching of the data from the food API. Sharva will start with getting the user preferences stored into the cloud and Russel will start to develop the profile section of the app.
