CS 440 Meeting Minutes

Group 5 Date: Wed Feb 11 Time: 4 pm Duration: 30 min

Present, on time: Arijus Trakymas, Sharva Thakur, Russel Tjahjadi, Mohammad Zaid

Present, not on time: NA

Absent: NA

Synopsis: We began implementing the technologies that we decided on last week in code and ran into some problems, hence, we needed to find more on how the technologies could work for us to continue with development.

Recent Accomplishments: Arijus has set up the project repository and has firebase and flutter installed. Sharva has made some progress in making the signup screen. Russel has made some progress with the login screen. Zaid has made some progress on how the screens should flow and how each page will flow/what screens will appear after a certain button is clicked.

Current Activities: Russel and Zaid have looked through the different strategies on how to implement the UI in Flutter. Arijus and Sharva have looked into how to implement the backend for this project to store user data in the cloud.

Action Items: Russel will try to finish a draft of a login screen. Sharva will try to finish a draft of a signup screen. Zaid will try to decide which design is better to display on the homepage of the application and will find out more about customer experience when using the app. Arijus will look more into the backend side and teach the rest of us how it works so that we can see how it is to be integrated with the front end.
