CS 440 Meeting Minutes

Group: 5 Date: 9 April 2023 Time: 2pm Duration: 30 mins

Present, on time: Arijus Trakymas, Russel Tjahjadi , Sharva Darpan Thakur , Mohammed Zaid

Present, not on time: N/A

Absent: N/A

Synopsis: We have shown the client our current working app with the features successfully implemented.

Recent Accomplishments: Arijus and Sharva will still continue on research ways to store data in the cloud. Zaid will continue on researching ways to keep the user logged in when they have already logged in. Russel has used the spoonacular API and the flutter library to obtain the nearest restaurants near the user.

Current Activities: Arijus is working on a way to make the design of the navigation screen smoother. Russel is starting to improve the design of the restaurants page in the app. Sharva is trying to implement which ways are better to display the recipes to the user. Zaid is finding a way to have the users still log in even if the app is closed.

Action Items: Arijus and Zaid will find a faster way to obtain the recipe information from the spoonacular API when the app is opened. Russel will start to implement the user profile section. Sharva will start to find ways to enhance the process of smoothly transitioning between pages.
