# CS 440 Meeting Minutes

Group 5  Date: 10 March 2023  Time: 7pm  Duration: 30 mins

Present, on time: Russel Tjahjadi, Mohammad Zaid, Arijus Trakymas , Sharva Darpan Thakur

Present, not on time: N/A

Absent: N/A

---

Synopsis: We will be starting to implement the features in our application  from all the research completed.

Recent Accomplishments: Zaid researched and found ways on how to keep the user logged in once the user is logged in. Sharva and Arijus worked on sending the input preferences information to the Firebase and linking it to the user information. Russel developed a prototype design for the user profile section of the application.

Current Activities: Arijus is researching on making the recipe icons in the home screen page clickable showing more detailed information about that particular recipe. Russel is working on adding a feature in the application to enable the current location of the user which will ultimately be used to display the nearby stores.

Action Items: Sharva and Arijus will work on implementing the research ways of sending the user data to Firebase. Zaid will finish letting the user stay logged in even after closing the app. Russel will finish developing the option for users to view restaurants when the user does not want to cook.
